Accelerate your business and increase your turnover

Me focusion increasing the business turn over by ennancing the operational efficiency through a combination web, mobile and tablet solution. Making the right data available for the workforce at the right time will increase me sceed of doing business and thus increases the revenue multi fold

Knowing the credit balances and stock during order taking would help the customer to optimize the order. Instant Information on the order like order status, pending items. dispatch status etc. would help tus etc would help the marketing executives to have good customer dealing Automated accounting would reduce the complexity of accounting. Easy handling of GST/VAT returns would ensure the compliance
