CENTRE OF EXCELLENCE

Largest open source software using Python

✓ **2000+ Open Source Community Contributers**

✓ **Huge repository of business apps in Odoo Appstore**

Largest Community

Odoo foundation is driven by 2000+ open source contributors across the globe. It follows all open source standards and is strictly adhered by timeline. Every October a new Odoo version is released incorporating all trending programming paradigms and latest version of foundational libraries. It follows LGPL licensing policy and hence it can be used for building any software products

Largest App Store

Odoo is a suite of business apps launched from a single software. Odoo has all core features of ERP covering sales, purchase, inventory, accounting, manufacturing, CRM, HR, Payroll and more. It also covers business development features like Website, eCommerce, Marketing tools, E-learning etc. In addition it has a huge Apps repository of apps contributed by community.

Technology Landscape

Python & JavaScript
Odoo always incorporate latest stable version of Python and leverage its libraries. Odoo also has a strong JavaScript framework using which exciting user interaction components are developed.

Post GRE SQL & ORM framework
Odoo uses Post GRE SQL as its database engine. Odoo interact with database through its own powerful ORM framework which is highly performance optimized

OWL Frame work
Odoo has strong web library named as OWL and incorporates best features of View and React JS. With this developer can create small reusable fragments and components which gives great user experience

QWeb Template
Odoo front end design completely implemented in XML template which helps in easy customization and is an industry standard. Odoo has implemented a separate framework for this and is named as QWeb Template
